

Team Contract

Team 5

Group Member Profiles

David Reti

Phone: (647) – 838 - 2154

Email: dreti@uoguelph.ca

Strengths: Wide knowledge of software systems, front end, backend, interviewing clients and producing presentation and records

Weaknesses: Developing new algorithms from scratch, dealing with group members not doing their share of the work, or those that are incompetent.

Availability (days and hours): Lab time, plus Thursday after 4PM

Ryan Paul

Phone: 647-923-7253

Email: rpaul06@uoguelph.ca

Strengths: Time Management, Organized and Determination to learn new skills

Weaknesses: coding with C, linked lists, memory management

Availability (days and hours): Not available on the weekends but available after classes.

Brandon Lit

Phone: 226-203-6783

Email: blit@uoguelph.ca

Strengths: Opposable thumbs, Experience in Java, C, Javascript, HTML CSS, PERL, PYTHON

Weaknesses: Personal Time Management, Biting off more than I can chew (Also: Guns, Knives and Tanks)

Availability (days and hours): Lab times, weekends, TBD (based on events, early warning would be nice)

Alexander Kim

Phone: (905) 466-6329

Email: akim04@uoguelph.ca

Strengths: C, high level design commenting

Weaknesses: Allergic to Pineapples, messy, gets frustrated at code easily

Availability (days and hours): Tuesday, Wednesday, Thursday POST 4PM Saturday Sunday

Abdalaziz Elshamli

Phone: 2265006239

Email: rex3prime@gmail.com / abdalazi@uoguelph.ca

Strengths: Experience with project management and leadership

Weaknesses: I get tired/fatigued when sitting for long periods of time (fix by taking 5 mins breaks in labs)

Availability (days and hours): between lectures and after

Noah Chalifour

Phone: 226-821-2423

Email: nchalifo@uoguelph.ca

Strengths: Good team management skills

Weaknesses: Hard time at staying focused

Availability (days and hours): Not on Tuesday and Thursday during the day

Luca Bozzetto

Phone: +1 5197316399

If you plan to use whatsapp please use my italian number instead: +39 3480884737

Email: lbozzett@uoguelph.ca

Strengths: Good programming skills, interested in cybersecurity, Enjoy working in teams

Weaknesses: My mother tongue is not english (I'm an international exchange student). Serial procrastinator.

Availability (days and hours): Usually between classes and on Saturday.

Group Conditions & Agreements

Meetings

Meetings will take place in the normal lab time as much as possible (Friday at 2:30). Additional meetings will only take place when necessary and the time will be agreed on individually for each meeting. We believe this is a good solution because we don't expect additional meetings to be a regular event, because we have busy schedules, and because we want additional meetings to be well considered.

Communication

The main method of communication for the group will be slack. Group members will be expected to check slack regularly, but as a backup email can also be used, as all the group member emails are recorded.

Tools Used

The group will use Git for managing code and deliverables through the GitHub online git hosting platform. Trello will be used to coordinate the work and progress on project deliverables and track the overall status of the project.

Intellectual Property

The project deliverables will be the property of the group, with all group members having equal share. The code and final product will be made accessible to all group members, the TA for the Friday lab section, as well as the Professor. This IP will be made accessible to others ONLY with the written approval of all group members. The group may use external libraries in the form of source code and compiled binaries. External sources will be cited ACCORDING TO THE LICENSE. This means that citations may appear in a readme file, in source files or in the software itself. An effort will be made to NOT use GNU/GPL licensed software, but in the case it is used, the source code will be distributed with the software in all cases.

Roles & Role Sharing

Roles will be assigned based on the necessary tasks related to the deliverable being worked on. In other words, the team will assign roles such as Repo manager, front end manager, presentation typer etc. Meeting records will be written by David.

Missed Obligations

If a group member does not submit their share of the work, they will be sent a number of messages on slack on also by email. If they still do not do their work, the TA will be notified to indicate the effect of this group member on the project. Team members will be expected to contribute, and their status with the rest of the team will be affected if they do not.

We, the team (as stated above) agree to the terms of this contract, understand its implications, will follow its procedures and will not object to decisions made on its basis.
